

**PETSKART**

UI Design and Prototyping

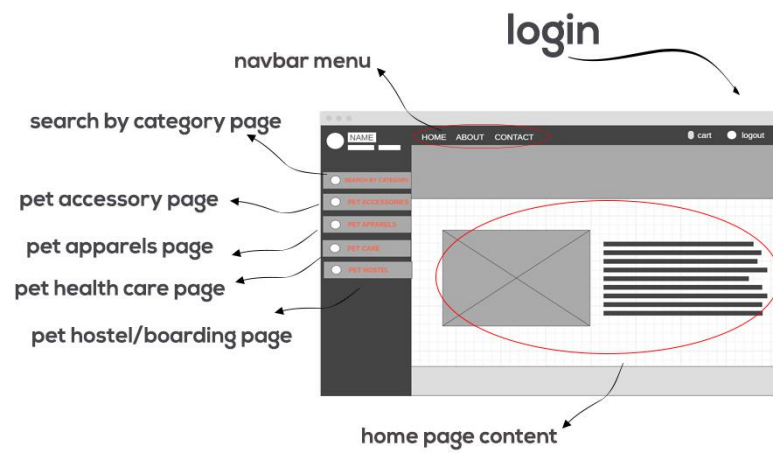

## 1.INTRODUCTION

PETSKART is a website (mostly like an ecommerce website) which provides the ability to sell, buy or adopt pets. The attraction of the site doesn't stop just there, the website also provides the accessories, food and other utilities that are needed as part of owning a pet. It also provides Tips as carousals. There will be so many clinics and Doctors tie upped with this website. By opening up few outlets in some of the major cities we can start to certify the pets based on its health condition and other criteria. Outlets can also act as pet shops also. So, using this website customer can get quality breeds from distant places also.

### 1.1. LIST OF FEATURES
