

HCraft

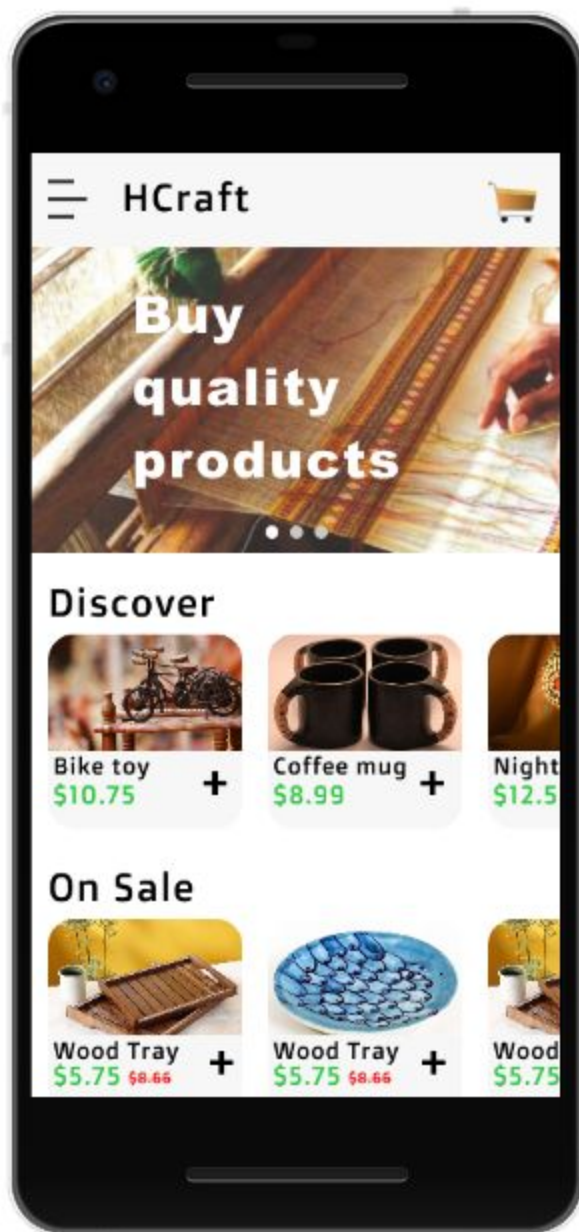

Introduction:

HCraft is a e-commerce solely dedicated to buy/sell quality handmade products. This project helps many small/large scale entrepreneurs who make handmade products to sell their products and helps users to buy quality handmade products.

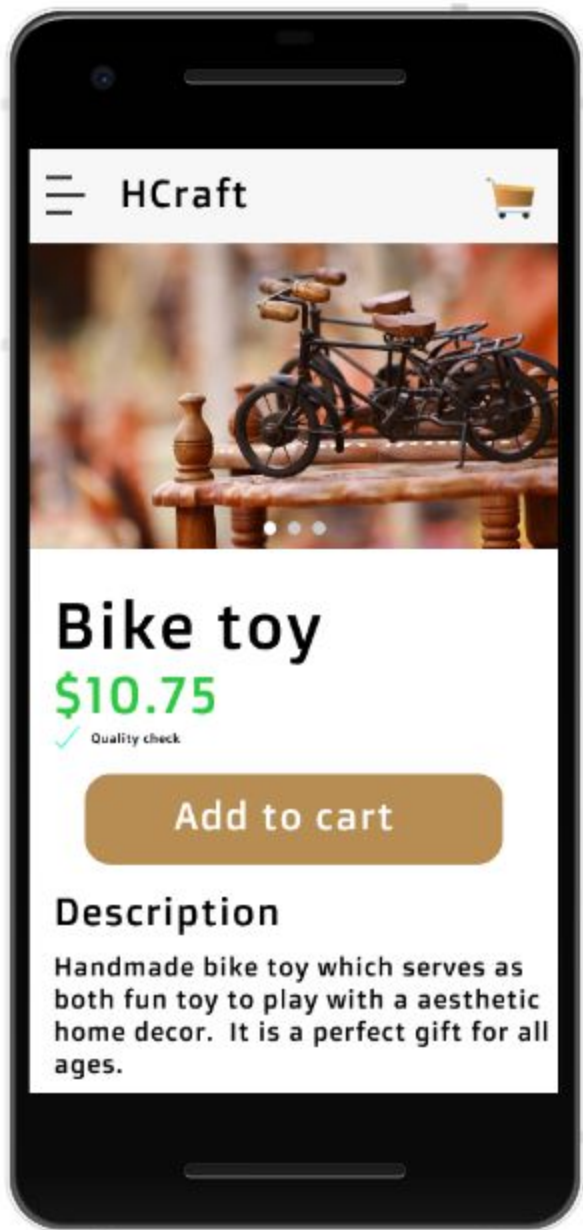

User Interface Design and Prototype:

This is the Customer login page where users can login/signup their accounts.

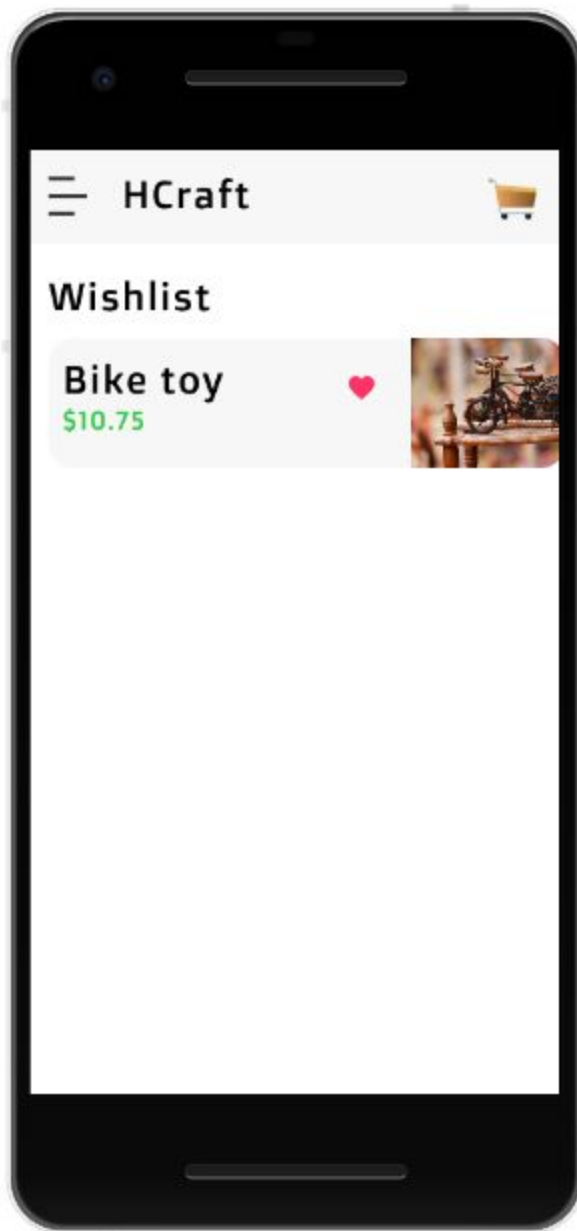

This is the homepage of HCraft

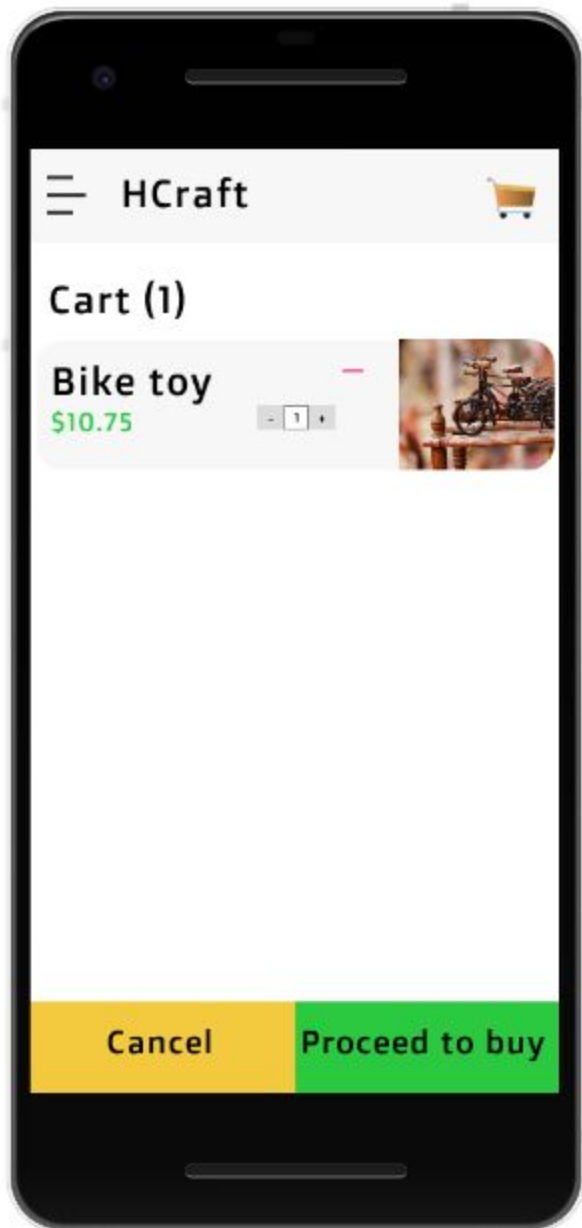

This is the product page where a detailed information of a product is displayed.

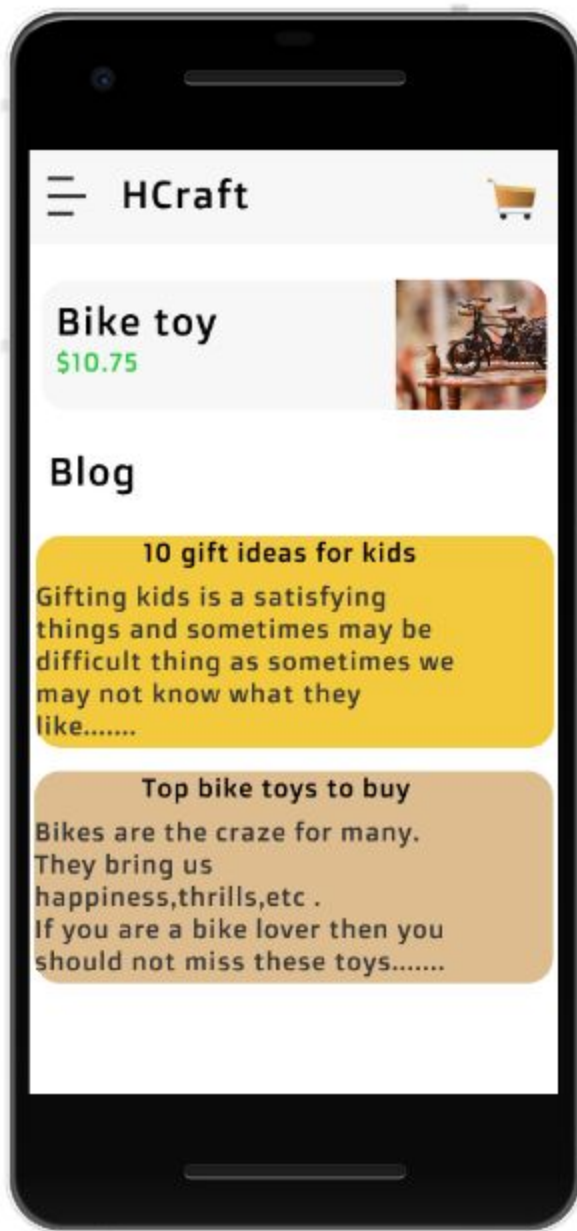

This is the customer-seller chat page where customers can chat with sellers for any queries/after-sale support.

This is the wishlist page where users can store their liked products from where they can buy them later.

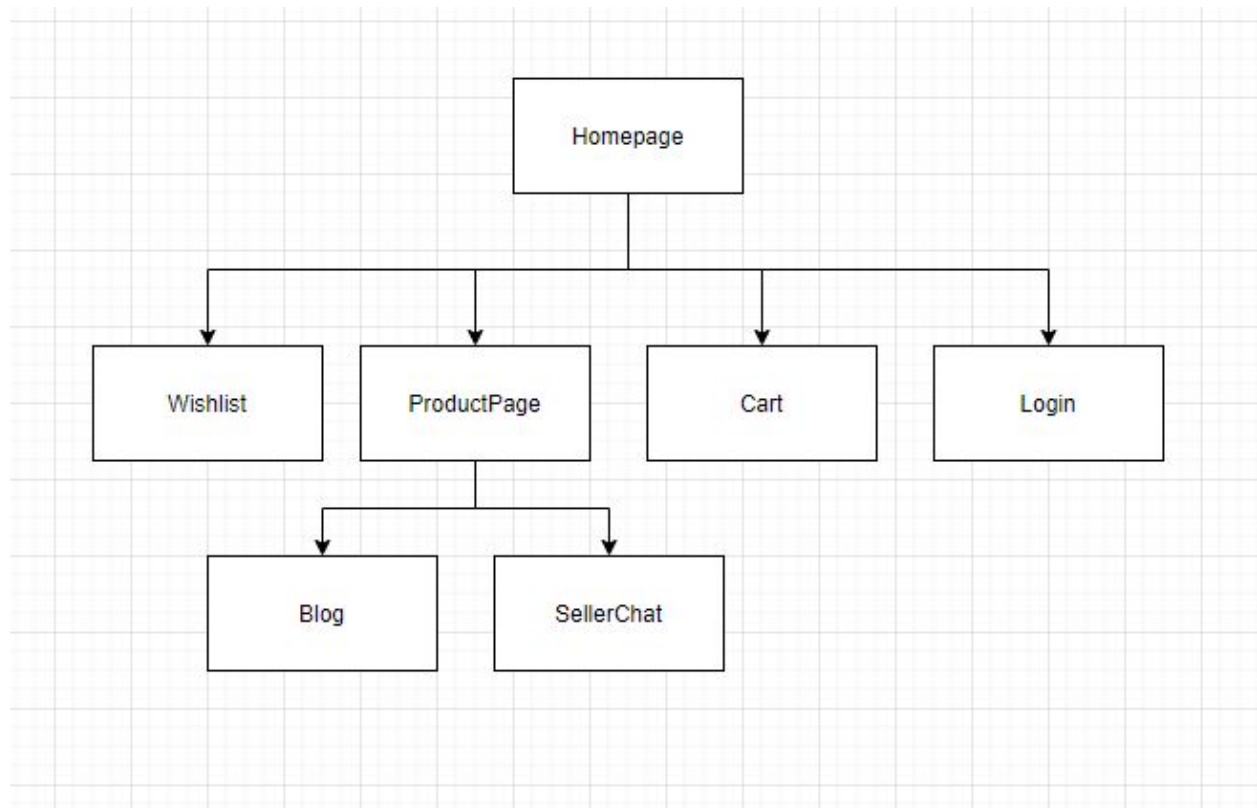

This is the cart page.

This is the blog page where in depth reviews and blogs on a particular products are made

The user interface designed in such a way it is easy to navigate and use.

Navigation Structure:
